

International Society for Biological Calorimetry (ISBC)

XIX ISBC: Calorimetry in Life Sciences Basel, June 22-24, 2016

The XIX ISBC conference is organized by the University of Basel, the University hospital of Basel and the International Society for Biological calorimetry. The research on different calorimetric studies of biological processes will be presented.

Basel lies in the heart of Europe, on both banks of the Rhine. The city is the centre of the idyllic Three-Country Corner of France, Germany and Switzerland – lying between the Swiss Jura, Germany's Black Forest and the Vosges in Alsace. The area is also known as the BioValley that is one of the leading European Life Sciences regions in the world. We hope that many fruitful interactions will occur during this ISBC congress.

The conference will cover (but not be limited to) the following **topics of calorimetry**:

- Biotechnology
- Biothermodynamic
- Health and Life Sciences
- Environmental Sciences
- Food Science
- New instrumentation and methods

A 2-day summer school on calorimetry analysis will be organized before the congress.

We are looking forward to welcoming you in Basel.

Registration and abstract submission will open soon. Spaces for exhibitors will be available. ISBC website will be updated soon and more news will come.
